Help Protect Your Home From Wind-Driven Rain And Damaging Ice Dams With A

Leak Barrier

A Quality Leak Barrier Will:

Help prevent water penetration at the most vulnerable areas of your roof (at the eaves and rakes, in valleys, around chimneys, etc.).

WeatherWatch®, a quality Leak Barrier, will:

- Help protect your home from costly repairs due to wall and ceiling staining from leaks
- Help prevent leaks due to water damming in your gutters, wind-driven rain, and, in the North, damaging ice dams

Help Protect Your Home

- ***The Codes Are Clear...*** Protection against ice dams is *required* by most building codes* at eaves wherever the January average temperature is 25°F (3.8°C) or lower or where there is a possibility of ice forming in the eaves—i.e., the area labeled “North”

†In the “North,” building codes *require* the use of leak barrier at the eaves.
